

**Directory of
Veterinary Public Health
Faculty of India
Year - 2014**

Patronage

*Indian Association of
Veterinary Public Health Specialists
(IAVPHS)*

Kind attention:

It is deeply regretted if some faculty's name is missing in the Directory. Due to time limit, there could have been communication failures to reach you for gathering your information and in no way it was intentional.

Esteemed faculty members working in various central or state Government institutes/ colleges in the department/ division of Veterinary Public Health (VPH) or Veterinary Public Health & Epidemiology (VPE) are requested to send their updates (address, position, contact information, etc) to the following,

Dr. Nagappa Karabasanavar,
Assistant Professor, Department of Veterinary Public Health & Epidemiology,
Karnataka Veterinary, Animal and Fisheries Sciences University (KVAFSU)
Veterinary College, P.B. 53, Vinobanagar, Shivamogga – 577 b2014, Karnataka
Email: pub.nag@gmail.com / docnagappa@rediffmail.com; Cell: +91-7204776725;

DISCLAIMER

The information gathered for compiling of this Directory is through personal communication with the concerned faculty, professional colleague or from official website/ databases available in the public domain. The order of arrangement is merely a compilation and does not represent order of merit or seniority. Person or the Association is not responsible for the authenticity of the contents printed in the Directory. This compilation is for the benefit of the profession and doesn't involve any monetary, personal or organizational gain; hence any issue related to copyright, IPR, legal claims, etc arising thereof are not entertained.

Foreword

Veterinary Public Health is a cross cutting discipline, which contributes to the physical, mental and social well-being of humans through an understanding and application of veterinary science. Its approach has always been interdisciplinary and inter-sectoral in nature. In order to ensure it, we need to practice 'One Health' originally promulgated by Schwabe and recently taken up as an initiative in the country. It is the time now to address need based issues by collaborating not only within veterinary but also other related professions like medical/ public health engineering/ environmental sciences/ basic sciences, etc

In the rapidly growing Veterinary Public Health profession, Indian Association of Veterinary Public Health Specialists has been playing a pivotal role since its inception, in bringing together public health professionals on a common platform and setting agenda for research and service to the nation. The association has successfully organized XI conferences on focus areas of VPH, where cross fertilization of ideas among different stakeholders have taken place and given opportunities for inter-sectoral networking. Journal of Veterinary Public Health published by the association is another tool in providing linkages among different professionals by disseminating advances in knowledge and service. In order to further strengthen the ties, the executive committee of the association has taken an initiative to publish a directory of all VPH professionals working in various institutes/ colleges across the country for better networking. This initiative is praise worthy and would in long run help our VPH professionals to bridge gaps, establish liaison and work in the common areas.

I am extremely delighted to find the faculty members working in various states/ UTs under one single compilation of 'Directory of VPH faculty of India'. I congratulate IAVPHS for taking up this task.

MESSAGE

It gives me immense pleasure to learn that IAVPHS is bringing out the Directory of Vety. Public Health (VPH) faculty this year. I congratulate all the members especially Dr. Nagappa, K., whose untiring efforts and dedication has fulfilled this long felt necessity. It brings us closer to each other and helps us in interacting with fellow scientists. We have had many firsts for VPH profession vis-à-vis human and animal health. As the time passed, VPH established itself as an indispensable discipline not only in India but the World over.

However we, as public health veterinarians, in the initial difficult periods; had no platform to raise our concerns and interact with other disciplines and professions to share, participate and impel our views. As a result, I along with few other scientists of VPH Division, IVRI, resolved and established IAVPHS in 1996/1997. All the members of the association have worked with selfless devotion for the development of the organization. Association has come a long way creating awareness about VPH. It has chronology of land mark achievements like instituting Dr. V. N. Bachhil young scientist award in VPH, publication of first Journal of Vety. Public Health, “Fellowship” for outstanding public health veterinarians, lifetime achievement award to celebrated VPH scientists, Dr. S. P. Singh best research paper award (IVPH), “public health veterinarian of the year award and now publication of V P H Directory – all firsts”.

I am sure, this “Directory” will prove to be another milestone in the annals of associations history. Keep it up.

MESSAGE

Veterinary Public Health (VPH) is an integral part of public health that encompasses veterinary contribution to the healthful living. As human evolution took place in association with other creatures in the nature; there exist similarities between other lower animals and the human beings with respect to susceptibility, pathogenesis and their mitigation. Although the two healing arts i.e. human and veterinary medicines transformed as professions in isolation upon time, but there have been tremendous inputs to the human medicine from the veterinary side. Yet in grown in separation, the thinkers of each profession are now realizing for common platforms to combat maladies that affect human life and have economic considerations in animal side. It is very timely to realize the concept of 'one medicine' and reach every corner in an endeavor to uproot the dreaded diseases that affect human and animal populations.

Inter sectoral and inter disciplinary activities initiated in the recent past by the concerned agencies is warranted and encouraged. However, to cater the needs of the society, still there is a lack of network of people working on such similar areas. Centralized database of experts to work on needy tasks is mandatory; and its non-availability is a concern.

It is timely that compilation of a directory of VPH faculty in India has been taken up by the IAVPHS so as to link professional working in the areas of common interest. The intension of this directory is not a mere compilation, rather a way forward to make teams of expertize so as to address researchable issues linked to the VPH in particular and societal welfare in general.

I am hopeful, more and more people get connected in future, communicate and shape the ways for combating dreaded diseases and issues affecting the public health.
